**Re: Goodwin Street Reconstruction  
Hickox Street & Kirtland Street Pavement Resurfacing**

The Village of Burton Has hired a contractor (Eclipse Company, LLC from Chagrin Falls, OH) to reconstruct Goodwin Street from the intersection at North Cheshire Street to the Intersection at Peckham Road. This work includes waterline reconstruction, storm sewer reconstruction, and pavement reconstruction. The road will be open for local traffic for most of the project; however certain phases of the project will require a full road closure. A notice will be distributed once those dates are determined as the project progresses. There will be trucks, construction equipment, and workers on the roadway throughout the duration of the project. For residents living along this stretch of roadway, a notice will be given by the contractor at least 24hrs in advance if a driveway will be blocked due to construction work to help minimize any inconvenience to the property owners.

There will also be short periods of time when the water services will be turned off when the services are transferred from the old line to the new line. Again, you will be notified prior to this occurring and every effort will be made to minimize any inconvenience.

The contractor is planning to mobilize equipment and materials starting the week of June 22<sup>nd</sup> and start construction Monday June 29<sup>th</sup>. The project will last until the middle of October. The roadway will be open to traffic during the entirety of the Geauga County Fair.

Pavement resurfacing will also be taking place along Hickox Street and Kirtland Street from Burton square to Goodwin Street. Drive aprons will be re-surfaced during this project and the property owners will be notified before this work takes place.

Any questions or concerns, please contact Village Hall at 440-834-4474. The Village office will then direct your call to the police department, utilities department and/or the village engineer depending on the nature of your concern.
